PRINCIPLE 4 MATERIAL STEWARDSHIP		
4.1a Environmental Life Cycle Assessment (life cycle impacts)	Conformance	The Entity has assessed the life cycle impacts of its products specific data for all production sites and published the data in a "Life Cycle Assessment", accessible from: https://www.borbet.de/medien/files/e1fce69590.pdf
4.1b Environmental Life Cycle Assessment (cradle to gate)	Conformance	The Entity has evaluated the life cycle impacts of its products and published the data in a "Life Cycle Assessment", accessible from: https://www.borbet.de/medien/files/e1fce69590.pdf Existing customer requests regarding cradle-to-gate assessment were met.
4.1c Environmental Life Cycle Assessment (public communication)	Conformance	The Entity's Life Cycle Assessment (LCA) is publicly available at: https://www.borbet.de/medien/files/e1fce69590.pdf Not all data have been measured but have been calculated, based on data provided by a specialized database (ecoinvent). Readers of the Life Cycle Assessment are informed in the LCA study, that information about underlying assumptions is available on request.
4.2 Product design	Conformance	The Entity has established clear objectives in the design and development process for its products to enhance sustainability, including the environmental life cycle impacts of the end product. The main aspects include the reduction of weight and more effective improvement of aerodynamics of the wheels. The Entity uses advanced production technologies that reduce material consumption and optimise aerodynamics, such as flow forming, performance rim and undercut, which enable a weight reduction

CRITERION	RATING	COMMENT
		of up to 1.5 kilograms per wheel compared to conventional technologies. However, the design decision rests with the customer and the Entity has only limited influence on the design of its products.
4.3a Aluminium Process Scrap (targets)	Conformance	The Entity has implemented systems and programs to recycle nearly 100% of its Aluminium Process Scrap, either within its own site, within the BORBET Group or at external partners.
4.3b Aluminium Process Scrap (alloy separation)	Conformance	The Entity has no need to separate different grades of aluminium, as almost all of its aluminium has a similar alloy specification which will not degrade during remelting.
4.4a Collection and recycling of products at end-of-life (strategy)	Minor Non-Conformance	The Entity has demonstrated its recycling strategy, which is based on the mandatory recycling of vehicles according the European Directive 2000/53/EC on end-of-life vehicles. However the strategy is focussed only on the European market, as it not does not cover geographic regions outside the scope of the before mentioned EU directive.
4.4b Collection and recycling of products at end-of-life (engagement)	Minor Non-Conformance	In Europe, it is legally mandated that all motor cars are dismantled and recycled ("ELV" Directive - 2000/53/EC). However, there was no evidence that there are initiatives to systematically recover and recycle wheels from geographic regions outside the scope of the before mentioned EU directive in place. The Entity's products (aluminium alloy wheels) are a component of cars and end-of-life provisions of these are also and mainly the responsibility of the car manufacturers.
