ENTITY OVERVIEW

Ardagh Metal Packaging (AMP) (the 'Entity') is the Brazilian subsidiary of the multinational Ardagh Group, a manufacturer of metal and glass packaging, with a presence in 16 countries and more than 20,000 employees. In Brazil, the company has established itself as one of the main suppliers of Aluminium cans for beverages, with a focus on innovation, sustainability and operational efficiency.

Ardagh currently operates three industrial units in the country: two can factories located in Jacareí (São Paulo) and Alagoinhas (Bahia), as well as an end factory in Manaus (Amazonas). These Facilities are complemented by a corporate office based in the city of São Paulo. Together, these units have a production capacity of over six billion cans per year.

The Entity commenced operations in 2021, currently employs over 420 persons and produces Aluminium beverage can bodies with an annual production of two billion saleable products (cans) for the Brazilian market. Key physical features of the site include three production lines, producing four can sizes.

Within the scope of sustainability, the company has implemented strict environmental management practices. The three factories have achieved "Zero Landfill" status, ensuring that 100% of industrial waste is recycled, reused or sent for co-processing. This result is in line with Ardagh's commitment to the principles of the circular economy, promoting the responsible use of resources and reducing environmental impact.

In addition to industrial and technological advances, Ardagh is reinforcing its commitment to social development through the Ardagh for Education program, in partnership with the Social Service for Industry (SESI). The initiative plans to invest 25 million BRL over 10 years in actions aimed at training teachers, teaching robotics and promoting STEM education for around 200,000 students in communities close to the Jacareí, Alagoinhas and Manaus units.
